GENERAL INTRODUCTION

CHAPTER 1: INTRODUCTION

1.1. CANINE AGGRESSION
   1.1.1. Introduction
   1.1.2. Aggression as a part of normal canine behaviour
   1.1.3. Aggression promoting factors
   1.1.4. Classification of aggressive behaviour
   1.1.5. Discussion

1.2. RECEPTORS INVOLVED IN THE MECHANISMS OF AGGRESSION
   1.2.1. Introduction
   1.2.2. Androgen receptor
   1.2.3. Serotonin-1B receptor
   1.2.4. Neurokinin-1 / Substance P receptor

1.3. THE BASOLATERAL NUCLEAR GROUP OF THE AMYGDALOID BODY
   1.3.1. Introduction
   1.3.2. Morphology of the canine amygdaloid body
   1.3.3. The amygdala and aggressive behaviour

1.4. QUANTIFICATION WITHIN THE BASOLATERAL NUCLEAR GROUP OF THE AMYGDALOID BODY
   1.4.1. Stereology
   1.4.2. Differentiation of cells in the central nervous system

1.5. LITERATURE

CHAPTER 2: MATERIALS AND METHODS

2.1. ANIMALS
   2.1.1. Control group
   2.1.2. Aggressive group

2.2. SAMPLING AND QUANTIFICATION
   2.2.1. Sampling
   2.2.2. Quantification
      2.2.2.1. Stereology
      2.2.2.2. Differentiation of cells in the central nervous system

2.3. STAINING PROCEDURES
   2.3.1. Stainings for morphological analysis
      2.3.1.1. Nissl staining
      2.3.1.2. Weil staining
   2.3.2. Immunohistochemical Stainings
      2.3.2.1. Pretreatment
      2.3.2.2. Anti-GFAP
      2.3.2.3. Anti-CNPase
      2.3.2.4. Immunohistochemical staining using signal amplification
         2.3.2.4.1. Anti-AR
         2.3.2.4.2. Anti-serotonin-1B receptor
         2.3.2.4.3. Anti-substance P receptor
